How can insights improve future marketing strategy?

1.Campaign Optimization

Insight used:
* Underperforming Campaign table

Action:
* Pause poor campaigns
* Improve targeting, creatives, or messaging

Campaign-level analysis helps identify underperforming campaigns, enabling targeted optimization or discontinuation to prevent inefficient budget usage

2.Channel Strategy Refinement

Insight used:
* Conversion Rate by Channel

Action:
* Scale channels with high conversion rates
* Use low-conversion channels for awareness, not sales

Channels with higher conversion rates can be prioritized for performance-driven objectives, while lower-converting channels may be repositioned for brand awareness.
